

Math and Logic Apps for the iPad

by Karen McDonald

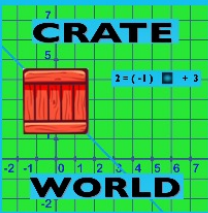

MathScribble+ Bundle

5 apps for the price of one (Math Scribble, Crate World, Perimetarea, Gem Detector, Xyla and Yabu)

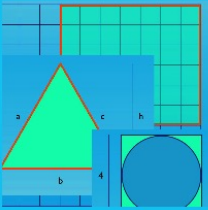

Firedrake's Gems

Move the dragon to find treasure on number lines and coordinate graphs. (12 activities in 3 levels) -- always FREE

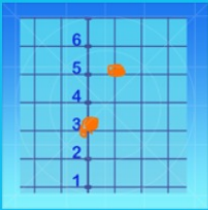

Crate World

Move crates with positive and negative integers on number lines, then with simple linear equations on coordinate graphs. (30 activities in 5 levels)

Perimetarea

Explore the secrets (area and perimeter) of geometric shapes, from rectangles and triangles to patterns made of circles and various polygons. (42 activities in 7 levels)

MathScribble

Write and draw on math backgrounds including number lines, coordinate graphs, geometric shapes, and grids of squares, then erase and do it again. (17 backgrounds)

Xyla and Yabu

Trade gems with Xyla and Yabu. Learn about parts and wholes with number bond bars for sums to 20 and 100. (20 activities in 2 levels)

Gem Detector

Use logic as well as luck to find gems and avoid making unnecessary excavations! (4 levels of play)
